ER30001 "1968 INTERVIEW NUMBER"

1968 Interview Number (1968 ID Number)

This variable is the 1968 family ID number. The combination of this variable and Person Number (ER30002) provides unique identification for each individual on the data file. Individuals associated with families from the Latino and Immigrant samples, added to the PSID in 1990/1992 and 1997/1999, and 2017 respectively, were assigned 1968 IDs so that they, too, have unique identifiers compatible with the PSID structure for the core (SRC and Census) sample.

ER31987 "WHETHER IN US IN 1968"

Whether This Individual was in the U.S. in 1968, Imputed

This variable was created from the 1990 data collected in ER30672-ER30676 and the 1993 variables ER30765-ER30769. The set of questions was asked about individuals from the Latino sample in order to determine whether they had a chance of being selected for the core sample, an issue in the creation of the 1990-1992 combined core-Latino weights (1990 ER30688, 1991 ER30732 and 1992 ER30805). Cases with missing data on ER30672-ER30676 or ER30765-ER30769 were imputed proportionally. The proportions were based on the distribution within each Latino subgroup, using only cases with nonmissing data. This variable was updated for individuals not present in the previous year who moved into the study in 1991 and 1992. This is a nonissue for nonsample movers-in, but a few Latino sample individuals had "appeared" after 1990; that is, they had been in the 1990 family but their existence was not discovered until 1991 or later. If such persons were born since 1968 and information about their parents was available, then that information was used to assign codes here. If, however, they were already living by 1968, it was necessary to impute as mentioned above. Children born into the sample after 1990 received values based on their parents' information if known; if parental data regarding whereabouts in 1968 was missing, then values here were imputed.

- 1 Yes, this individual (or at least one parent, if individual was born in 1968 or later) was in the U.S. in 1968 and thus was eligible for the core sample
 - 5 No, this individual (or neither parent, if individual was born in 1968 or later) was not in the U.S. in 1968 and thus was ineligible for the core sample
 - 0 Individual from core or Immigrant sample (ER30001=1-2930, 3001-3511, 4001-4851, 5001-6872); Latino nonsample individual (ER30001=7001-9308 and ER30002=170-228); Latino sample individual who first appeared in the study after 1993 (ER30001=7001-9308 and ER30862=09)

ER31988 "ETHNICITY ELIGIBILITY FOR LNPS"

Latino National Political Survey Eligibility: Reported Ethnicity within LNPS Sampling Area

This variable was used in the creation of the 1990-1993 combined core-Latino weights (1990 ER30688, 1991 ER30732, 1992 ER30805, and 1993 ER30866). If the individual is core, it indicates whether the family to which this individual belonged in 1990 had a chance of inclusion in the LNPS because of ethnic affiliation of any family member living in an LNPS sampling area. If the individual was not in the study in 1990 but subsequently moved in, the indicator for the family into which he or she moved was assigned. For Latino sample individuals, the values indicate the ethnic affiliation of the family member who served as the respondent for the LNPS. This variable indicates the actual ethnic affiliation of persons, not the ethnic designation of their area of residence. Thus, a Mexican-American living in Miami (a Cuban-American LNPS sampling area) still receives a value of 1 for this variable. For further information about the LNPS sample design, see Section I, Part 13, of the 1990 Documentation. Both sample and nonsample members have values here. Unfortunately, after the 1968-1993 individual data were released we discovered that values for all Latino cases were missing from the file. These cases were filled with zeroes.

ER31989 "ETHNICITY OF LNPS SAMPLING AREA"

Latino National Political Survey Eligibility: Ethnic Designation of LNPS Sampling Area

This variable was used in the creation of the 1990-1993 combined core-Latino weight (1990 ER30688, 1991 ER30732, 1992 ER30805, and 1993 ER30866) to indicate in which, if any, of the three LNPS sampling areas the individual lived in 1989. This information was available for all Latinos, but data were missing for a few core cases. Those 1990 core cases missing information about state and county in 1989 were assigned 1990 location as a proxy. Similarly, some 1992 and 1993 core recontacts were also missing information from 1989. State and county data from 1992 and 1993 were used as proxies. See Section I, Part 5, of the guide to the 1993 family data, 93GUIDE.PDF, for details about the weights, and Section I, Part 13, of the 1990 Documentation for information about the LNPS sample design.

ER32001 "WTR ALWAYS IN RESPONDING FAMILY UNIT"

Whether Individual Has Always Been Present in a Responding Panel Family

This variable is generated by defining "always present" as follows:

CORE SAMPLE INDIVIDUALS whose sequence numbers for every year have been in the range 01-20 from 1969 through the present, whose person numbers are in the range 001-019, and whose relationships to Head in 1968 are in the range 01-09.

LATINO SAMPLE INDIVIDUALS whose sequence numbers from 1990 through 1995 were in the range 01-20. Individuals associated with Latino recontact families that were never interviewed until 1992 are included in code 3.

IMMIGRANT SAMPLE INDIVIDUALS from the 1997 sample addition whose sequence numbers from 1997 through the present were in the range 01-20; Immigrant sample individuals from the 1999 sample addition whose sequence numbers from 1999 through the present were in the range 01-20. Immigrant sample individuals from the 2017 sample addition whose sequence numbers from 2017 were in the range 01-20.

ER32002 "WTR EVER CODED INSTITUTIONAL"

Whether Individual Was Ever Institutionalized While Connected to a Responding Family

This variable is generated by selecting individuals whose sequence numbers have been in the range 51-59 in any year from 1969 through the present and/or whose person numbers are in the range 020-026 (thus indicating institutionalization in 1968 if core, 1990 if Latino, 1997/1999 if 97 Immigrant or 2017/2019 if 17 Immigrant). If such individuals had income during the portion of the year preceding their move out, this part-year income is included in the family-level data of the family whence they departed. In years following their institutionalization, no income questions were asked about them until they rejoined the family or split off.

ER32003 "WTR ORIGINAL SAMPLE/BORN IN/MOVED IN"

Whether Individual Was Born or Moved into the Panel Subsequent to the First Year of Interviewing

This variable is generated by selecting only those individuals whose person numbers are in the range 030-226, indicating birth or move in, or whose 1968 (for core--1968 ID number=0001-2930, 5001-6872), 1990 (for most Latinos--1968 ID number=7001-9043) or 1997/1999 for 97 Immigrants--1968 ID number=3001-3511 or 2017/2019 for 17 Immigrants--1968 ID number=4001-4851) data values contain only zeroes because, although in the family in that year, they were inadvertently omitted from the family listing. Such individuals were assigned original sample person numbers (001-019). These individuals may have appeared in the panel at any time subsequent to the initial year of interviewing (1968/1990/1997/1999/2017/2019). Individuals associated with Latino recontact families that were never interviewed until 1992 are included in code 4 below.

- 2 This core individual was missed in error in 1968, although an original sample member; 1968 and possibly subsequent data contain zeroes.
- 3 In 1990, this Latino individual was present, or was a spouse who had died or moved out; the data for 1990 are nonzero.
- 4 This Latino individual was born or moved into a panel family after 1990 and therefore has zero data for 1990; subsequent years' data may also contain zeroes. Latino recontacts (ER30001=9044-9308) are included here.
- 5 This Latino individual was missed in error in 1990, although an original sample member; 1990 and possibly subsequent data contain zeroes.

- 8 This 97/99 Immigrant individual was missed in error in 1997/1999, although an original sample member; the initial, and possibly subsequent, wave of data contains zeroes.

- 12 This individual was in an institution in 1968 if core, in 1990 if Latino, in 1997/1999 if 97/99 Immigrant, or 2017/2019 if 17/19 Immigrant, (ER30002=020-029)

ER32004 "WTR EVER MOVED OUT OF FU OR DIED"

Whether Individual Moved Out of a Responding Panel Family or Institution or is Deceased

This variable is generated by selecting individuals whose values for the Reason for Non-Response variables have ever been 41, including those with Sequence Numbers in the range 81-89 (mover-out deceased). Also included are those who moved out of a responding family or institution but did not join another in that same wave (mover-out non-response). Additionally, because Person Number (ER30002) was a proxy for Sequence Number in the 1968 wave, those core sample spouses who moved out or died in the year prior to that interview, i.e., whose person numbers equal 227 or 228, are included. Note the separate codes 2 and 3 for the mover-out deceased versus other deceased persons, respectively.

If any movers-out had income during the year preceding their move, this income is included in the family-level data of the family whence they departed for the portion of the year that they were resident in that family.

ER32005 "WTR EVER OUT OF STUDY 1 YEAR OR MORE"

Whether Individual Has Stayed Out of the Panel for a Year or More

This variable is generated by selecting core individuals with any year's ID number equaling zero from 1969 through the present. Main family nonresponse for the current year are included here, as well as nonresponse from other years. Mover-out nonresponse, however, must have moved out and stayed out for at least one wave, or died in a previous year in order to have any zero data at all on the file.

For Latino individuals, the yearly ID numbers were checked for zeroes from 1990 through 1995. Individuals associated with Latino recontact families that were never interviewed until 1992 are included in code 3. The ID numbers of 97/99 Immigrant individuals from the portion of the sample first interviewed in 1997 were checked from 1999 through the present; persons from the 1999 sample addition were checked from 2001 forward.

The ID numbers of 17/19 Immigrant individuals from the portion of the sample first interviewed in 2017 (ER30001=4001-4462) were checked through 2019. Persons from the 2019 sample addition (ER30001=4700-4851) will have a value of 6 as of 2019 wave (their year one interview).

ER32006 "WHETHER SAMPLE OR NONSAMPLE"

Whether Individual Is Sample

This variable not only indicates persons who were sample members but also flags nonsample members who were designated as followable. Thus far in PSID history, two such nonsample groups exist: nonsample elderly individuals, followed from 1990 through 1995, and nonsample parents of sample children if the children were under age 18, followed from 1994 through 2003.

Initially, the nonsample elderly have person numbers of 170 and higher and were aged 64 or older at the time of the 1989 interview and expected to be at least age 65 by the time of the 1990 interview. In each subsequent wave through 1995, a nonsample individual who was expected to be at least 65 years old by the time of the next interview was added to the group. Refer to Section I, Part 1, of the Guides to the 1990 and subsequent codebooks for further details.

Nonsample parents also have person numbers of 170 or greater. Initially, all such parents were designated in advance of the 1994 interview if any of their sample children were under age 18. These parents were followed until the youngest sample child reached age 25. As births of new sample members occurred from 1994 through 2003, their nonsample parent was made followable.

Beginning in 1994, children who were born since the initial interview for the sample to which they belonged and who carried the "PSID gene", that is, who had at least one sample parent but who did not move into a responding PSID family at birth, were designated moved-in sample members. Such children were assigned person numbers of 170 and higher but have individual weights for years when they are present in the PSID and otherwise fall under all PSID rules for sample members.

Some individuals whose cohort years are 1968, 1997 or 1999 and whose family met similar eligibility criteria to the immigrant refresher sample added in 2017/2019 became sample themselves as of 2019. Those individuals have a value of 4 on this variable.

ER32007 "YEAR OF MOST RECENT NONRESPONSE"

Most Recent Year of Nonresponse, Including Institutionalized Individuals

The most recent year of nonresponse is coded here. All individuals who are currently nonresponse have code values of 2017 here. Individuals who became nonresponse in 1972, for example, but returned to a responding FU in, say, 1990, have values of 1990 for this variable and values of 1972 for ER32008. The term "nonresponse" here includes those individuals who have moved to institutions, are not followed for interview, but who are tracked until the time when they set up their own households.

Note that values for main Latino sample individuals (ER30001=7001-9043) are only calculated for years when the Latino sample was active, that is, 1990 through 1995. Nonresponse individuals from the Latino recontact sample (ER30001=9044-9308) can have values in the range 1992-1995.

Similarly, values for 97 Immigrant sample individuals begin with 1997. Those from the 1999 sample addition (ER30001=3442-3511) begin at 1999.

Values for the 17 Immigrant sample (ER30001=4001-4462) individuals begin with 2017. Those from the 2019 sample addition (ER30001=4700-4851) begin at 2019.

ER32008 "YEAR FIRST BECAME NONRESPONSE"

First Year of Nonresponse, Including Institutionalized Individuals

The first year of nonresponse is coded here. In the case of main family nonresponse, this wave's data contain zeroes. For mover-out nonresponse, this wave's data contain some information, including part-year income data. The next wave's data contain zeroes unless, of course, the individual returned to a responding FU in that wave or remained in an institution. If the individual became nonresponse in the current wave, then the code value here equals that for the previous variable (ER32007).

The term "nonresponse" here includes those individuals who have moved to institutions, are not followed for interview, but who are tracked until the time when they set up their own households.

Note that values for main Latino sample individuals (ER30001=7001-9043) are only calculated for years when the Latino sample was active, that is, 1990 through 1995. Nonresponse individuals from the Latino recontact sample (ER30001=9044-9308) can have values in the range 1992-1995.

Similarly, values for 97 Immigrant sample individuals begin with 1997. Those from the 1999 sample addition (ER30001=3442-3511) begin at 1999.

Values for the 17 Immigrant sample individuals begin with 2017 (ER30001=4001-4462) . Those from the 2019 sample addition (ER30001=4700-4851) begin at 2019.

ER32009 "1968 ID OF MOTHER"

1968 Interview Number (1968 ID Number) of Individual's Mother

The actual 1968 ID number (the family-level identifier which, when combined with person number, uniquely identifies an individual) of the individual's natural mother is coded. These data were coded for all children whose births were reported in the retrospective birth histories gathered about their mothers in waves 1985-2019. For a detailed description of the types of people about whom birth history information was gathered, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

Additionally, individual identifiers linking mother and child were coded in other ways: mother's identifiers for all individuals in responding families in 1983 and 1984, for Heads and Spouse/Partners in the 1988 parent supplemental sequence, for children who received support from absent parents in 1997, for children with mothers in the FU in 1997-2011, and by PSID staff during family composition editing. The 1988 Time and Money Transfers data also yielded some information about children of Heads and Spouse/Partners, and the 1997 support supplement indicated children to whom support was given by a parent in the FU. More recently, the 2013 Rosters and Transfers data supplied information about children of Heads and Spouse/Partners. For further details see the documentation for the cumulative Parent Identification File, one of the PSID's family history files.

ER32011 "YEAR MOTHER BORN"

Year Individual's Mother was Born

The values for this variable indicate the year the mother was born, as reported in the 1985-2019 data collection effort, when this individual was mentioned as a child in the mother's birth history. For a detailed description of the types of people about whom birth history information was gathered, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

ER32012 "TOTAL # CHILDREN BORN TO MOTHER"

Total Number of Children Born to this Individual's Mother

The values for this variable indicate the total number of children, including this individual, reported as born to the individual's mother. The value for each case is up to date as of the wave that contains the most recently collected birth history information for the mother. No further birth history information is collected for her after she reaches age 45, or if she becomes nonresponse. Since she could subsequently give birth, this variable may not reflect the total number of children ever born to her. For a detailed description of the types of people about whom birth history information was gathered, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

ER32013 "ORDER OF BIRTH TO MOTHER"

Birth Order Ranking of Individual with Mother

This variable was generated from birthdate information collected in 1985-2019 as part of the mother's birth history data. If no birthdates contained missing data, then each child was rank-ordered from the earliest to the most recent date. If one or more birthdates contain missing data, then missing data are assigned to this variable for this individual. For a detailed description of the types of people about whom birth history information was gathered and the handling of multiple reports, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

ER32014 "BIRTH WEIGHT OF THIS INDIVIDUAL"

Birth Weight of This Individual at Birth-TOTAL OUNCES

The values for this variable indicate the birth weight in ounces as collected in the 1985-2019 birth histories of this individual's mother or father. The questions for 1985 asked only whether the birth weight was under 5 1/2 pounds, but those from 1986 on asked the actual birth weight. For a detailed description of the types of people about whom birth history information was gathered and the handling of multiple reports, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I. In 1985 when retrospective birth histories were collected, birth weights were asked about all children. However, in each wave from 1986 on, birth weight was asked only if the child had been born since January 1 of the prior calendar year. For individuals who were continuously in the study, this presents no problem because births were collected more or less as they happened, but when an individual is new to the study or returns after a period of nonresponse, birth weights for his or her older children are missing. This affects almost no born-in sample children and so should present minimal analytic obstruction.

ER32015 "MARITAL STATUS OF MOTHER AT BIRTH"

Marital Status of Mother at Time of Individual's Birth

This variable was created from marriage and birth history information pertaining to this individual's mother and collected during waves 1985-2019. It was constructed by comparing the mother's marriage history dates with this individual's birth date as reported in the mother's birth history. For a detailed description of the types of people about whom birth history information was gathered and the handling of multiple reports, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

ER32016 "1968 ID OF FATHER"

1968 Interview Number (1968 ID Number) of Individual's Father

The actual 1968 ID number (the family-level identifier which, when combined with person number, uniquely identifies an individual) of the individual's natural father is coded. These data were taken from the father's retrospective birth history information gathered in 1985-2019. For a detailed description of the types of people about whom birth history information was gathered, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

Additionally, individual identifiers linking father and child were coded in other ways: father's identifiers for Heads and Spouse/Partners in the 1988 parent supplemental sequence, for children who received support from absent parents in 1997, for children with fathers in the FU in 1997-2011, and by PSID staff during family composition editing. The 1988 Time and Money Transfers data also yielded some information about children of Heads and wives/"wives", and the 1997 support supplement indicated children outside the FU to whom support was given by a parent in the FU. More recently, the 2013 Rosters and Transfers data supplied information about children of Heads and Spouse/Partners. For further details see the documentation for the cumulative Parent Identification File, one of the PSID's family history files.

No further birth history information is collected for the father if he is Head and his legal Wife, present in the FU, is past age 44, if he is an other FU member and is past age 44, or if he becomes nonresponse. Since births to the father could subsequently occur, this variable may not reflect the total number of children ever born to him. For a detailed description of the types of people about whom birth history information was gathered, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

ER32051 "YEAR MOST RECENT PREGNANCY INTENTION REC"

Year of the most recent pregnancy intention record

Starting in 2013, for those individuals in responding FUs who were eligible for the Marriage and History Section of the questionnaire and reported a newborn child, they were eligible for a series of questions about future pregnancy intentions if they were also the respondent. We are providing this data as a new supplementary Family History file available from the PSID Data Center. Individuals may have multiple records across waves and this variable is the most recent year of any report.

<u>Value/Range</u>	<u>Code</u>	<u>Value/Range</u>	<u>Text</u>

ER32052 "YEAR THIS INDIVIDUAL'S COHORT BEGAN"

Year this individual's cohort began

The study has added several cohort refresher samples during the duration of the project including the Latino, the 1997/1999 Immigrant refresher and the 2017/2019 Immigrant refresher samples. This summary variable: YEAR THIS INDIVIDUAL'S COHORT BEGAN (ER32052) will indicate which year this individual's original family was first added to the study. In past waves, this was easily indicated by the range of the 68ID Interview Number (ER30001), however with the introduction of the Multiplicity sample in 2019 using the 68ID Interview Number alone is no longer sufficient.

The Multiplicity sample families are derived from the most recent Immigrant refresher sample added in 2017 (ER30001=4001-4462 and ER32052=2017). They are the adult parents, children, or sibling families who did not share the same Housing Unit as their nominator family and were screened as eligible and added to the study in 2019. Because these families (the 2017 Immigrant and the 2019 Multiplicity sample) are interconnected they must share the same 68ID Interview Number (ER30001=4001-4462) but YEAR THIS INDIVIDUAL'S COHORT BEGAN will equal 2019 (ER32052=2019) for the Multiplicity sample which indicates the year their original family first entered the study.

ER25001 "RELEASE NUMBER"

Release Number

November 2013: Correcting the following four variables: Births to OFUMS in 2003 (ER28077), Number of businesses owned by FU in 2004 (ER27907), Number of businesses owned by Head (ER27912), and Number of businesses owned by Wife (ER27942). Due to further hand look-ups after Release 2 was made, there are 198 cases that have different values for Head and Wife Taxable Income - 2004 (ER27953) and Total Family Money Income - 2004 (ER28037). In addition, we are suppressing previously released variables Beale Rural-Urban Code (ER28043), and Size of Largest City the county (ER28044).

February 2014: For Release 4 we have added four new coded variables in the philanthropy section M12code, M41code, M43code and M52code (ER27510A, ER27634A, ER27644A, ER27667A) and Collapsed Beale (ER28043A). In addition we have dropped fifteen previously released variables from the T-2 (Section R) range (ER27712-ER27726). These were originally released as family level variables for Head and Wife/"Wife" but since they also contain data for OFUMS, we have moved them to the Cross Year Individual File instead.

January 2016: For Release 5 we have added 96 new variables in the T-2 (2003) Income section, 86 of which are about time unemployed for Head (ER27711A1-ER27711B5) and Wife/"Wife" (ER27711F4-ER27711G8), time out of the labor force for Head (ER27711B6-ER27711D1) and Wife/"Wife" (ER27711G9-ER27711J4), and time employed for Head (ER27711D2-ER27711E7) and Wife/"Wife" (ER27711J5-ER27711L1). The other 10 new variables are T-2 hours worked, labor income, and accuracy checks for Head (ER27711E8-ER27711F3) and for Wife/"Wife" (ER27711L2- ER27711L6).

November 2017: For Release 6 we have added the aggregated consumption variables (ER28037A1-ER28037E3). These variables were previously released on a supplemental file. A correction was made to the imputation of missing data for vehicle gasoline costs, additional vehicle costs, and vehicle repair costs.

ER27449 "M1 WTR DONATION>25 TO CHARITY LAST YEAR"

M1. In this next to the last section, we will be talking about donations of time and money to charitable organizations.

Charitable organizations include religious or non-profit organizations that help those in need or that serve and support the public interest. They range in size from national organizations like the United Way and the American Red Cross down to local community organizations. They serve a variety of purposes such as religious activity, helping people in need, health care and medical research, education, arts, environment, and international aid. Our definition of charity does not include political contributions.

Donations include any gifts of money, assets, or property/goods made directly to the organization, through payroll deduction, or collected by other means on behalf of the charity. This interview is limited to donations made during the calendar year 2004, with one exception. We will be asking you separately about all donations that you made to help victims of last December's tsunami later in this section.

During the year 2004, did (you/you or anyone in your family) donate money, assets, or property/goods with a combined value of more than \$25 to religious or charitable organizations?

ER27520 "M14 WTR HEAD VOLUNTEERED PAST MONTH"

M14. Let's talk about volunteering through the kinds of organizations we've been discussing. By "volunteering" we don't mean just belonging to an organization. We mean doing unpaid work.

Some volunteering is ongoing, such as coaching, helping at school, serving on committees, building and repairing, providing health care or emotional support, counseling, delivering food, doing office work, and weekly church work. Other volunteering is occasional, like neighborhood clean-ups, fund raising drives, and special activities during the holidays.

In the last month, did you do any volunteer activity through organizations?

This question (and the three following, ER27521-ER27523) were asked about the respondent. In order to identify the individual to whom these questions refer, see ER27879. It contains the relationship of the respondent to the Head of the FU. For example, if ER27879=1, these questions refer to the Head.

This series of questions, M45-M52a (ER27654-ER27668), was asked only when one person of a couple (either Head or Wife/"Wife") was coded as not having volunteered in 2004 at M14c (ER27523). In order to identify the individual to whom these questions refer, see ER27879. It contains the relationship of the respondent to the Head of the FU. Combine this information with values from ER27523. Thus, for example, if ER27879 is coded 1 (Head) and ER27523 is coded 1 (Respondent only), then this sequence refers to the Wife/"Wife".

ER28038 "USDA NEEDS STANDARD-2004"

Annual Needs Standard for the 2004 Family--USDA Version

This is the Orshansky-type poverty threshold based on an annual food needs standard which is derived from weekly food costs. The weekly food costs are taken from USDA Low-Cost Plan estimates as published in the Family Economics Review, June 1967, and adjusted to take account of changes in family composition during 2004. It is converted to an annual amount and further adjusted for economies of scale by USDA rules as follows:

- Single personadd 20%
- Two personsadd 10%
- Three personsadd 5%
- Four personsno change
- Five personsdeduct 5%
- Six or more personsdeduct 10%

An additional adjustment for diseconomies of small households (in rent, etc.) was made as follows:

- 4.89 times the food needs for single persons
- 3.70 times the food needs for two-person units
- 3.00 times the food needs for all other units

The table for weekly food costs is located in the Wave XXV (1992) documentation at the description for V21487. The table is in 1967 dollars.

Please refer to the Wave VII (1974) Documentation volume, pp. 39-41, and to the User Guide for further details on the needs standard.

Note that this variable is not adjusted for inflation, nor is it exactly comparable to the official poverty standard; such changes are left to users. This needs standard is adjusted for changes in family composition during 2004 and is not adjusted for farmers.

This variable is suppressed (filled with zeroes) in the public release file to protect the anonymity of respondents. The data are available in a separate file to qualified users under special contractual arrangements with the PSID; for more information, contact us at PSIDhelp@umich.edu.

These codes are based on matches to the FIPS state and county codes. However, code values have been increased by one; that is, code 1 here is equivalent to code 0 as originally used by Beale and Ross. Metropolitan status is that announced by the Office of Management and Budget in June 1983, when the current population criteria were first applied to results of the 1980 Census. Adjacency was determined by both physical boundary adjacency and a finding that at least 2 percent of the employed labor force in the nonmetropolitan county commuted to metropolitan central counties.

ER28047 "COMPLETED ED-HD"

Head's Completed Education Level

Values in the range 1-16 represent the actual grade of school completed; e.g., a value of 8 indicates that the Head completed the eighth grade. A code value of 17 indicates that the Head completed at least some postgraduate work. Values were computed as follows: If it is not known whether Head attended college (ER27413=8 or 9) or the number of years of college is unknown (ER27416=8 or 9), then the value is 99. Otherwise, if Head attended college (ER27413=1), then the value is 12 plus the number of years of college attended (ER27416). Otherwise, if Head did not attend college, (ER27413=5), the values are as follows:

- (a) if Head is a high school graduate (ER27402=1), the value is 12;
- (b) if Head received a GED (ER27402=2), the value is the last grade finished (ER27405);
- (c) if Head neither graduated from high school nor got a GED (ER27402=3), the value is the last grade finished (ER27410);
- (d) if it is not known whether Head graduated from high school, got a GED, or neither (ER27402=8 or 9), then the value is 99.

Education is asked only when the FU acquires a new Head. In cases where the Head has remained the same person from the previous interview (ER27352=5), this variable has been carried forward from previous years' data with no updating or other change. Education was reasked of all Heads in 1985. See ER28052 for the recency of this information.

This variable differs from the individual level variable ER33817 in the treatment of Heads who received a GED but did not attend college. The family-level variable value for such Heads is the grade completed; for the individual-level variable, the value is 12.

Values in the range 1-16 represent the actual grade of school completed; e.g., a value of 8 indicates that the Wife/"Wife" completed the eighth grade. A code value of 17 indicates that the Wife/"Wife" completed at least some postgraduate work. Values were computed as follows: If it is not known whether Wife/"Wife" attended college (ER27317=8 or 9) or the number of years of college is unknown (ER27320=8 or 9), then the value is 99. Otherwise, if Wife/"Wife" attended college (ER27317=1), then the value is 12 plus the number of years of college attended (ER27320). Otherwise, if Wife/"Wife" did not attend college, (ER27317=5), the values are as follows:

- (a) if Wife/"Wife" is a high school graduate (ER27306=1), the value is 12;
- (b) if Wife/"Wife" received a GED (ER27306=2), the value is the last grade finished (ER27309);

- (d) if it is not known whether Wife/"Wife" graduated from high school, got a GED, or neither (ER27306=8 or 9), then the value is 99.

Education is asked only when the FU acquires a new Wife/"Wife". In cases where the Wife/"Wife" has remained the same person from the previous interview (ER27263=5), this variable has been carried forward from previous years' data with no updating or other change. Education was asked of all Wives/"Wives" in 1985. See ER28053 for the recency of this information.

Year in Which 2005 Head Most Recently Became New Head

This variable contains the year of data collection in which background information in ER27352-ER27448 was most recently gathered for the 2005 Head. If a Head splits off from the main family, e.g., through divorce, background information is reasked. Some of this information can change over time; thus, this variable can be used by the analyst to indicate which waves of data might be searched to update the variables concerned. However, in the 1985 and 1997 waves, most background information was reasked. The 2005 variables that are equivalent to background variables asked of all heads in 1985 are ER27373-ER27384, ER27391-ER27394, ER27400, ER27402-ER27420, ER27423-ER27440 and ER27442-ER27443; the 2005 variables that are equivalent to background variables asked of all heads in 1997 are ER27353-ER27359, ER27363-ER27369, ER27393-ER27396, and ER27421. All immigrant sample Heads were asked this information in 1997 (or 1999, for the immigrant sample addition). All recontacts were asked for background information in 2005.

This variable contains the year of data collection in which background information in ER27263-ER27351 was most recently gathered for the 2005 Wife/"Wife". If a Wife/"Wife" splits off from the main family, e.g., through divorce, background information is reasked. Some of this information can change over time; thus, this variable can be used by the analyst to indicate which waves of data might be searched to update the variables concerned. In 1985, all Wives/"Wives" were asked all of the background information. Immigrant sample Wives/"Wives" were asked this information in 1997 (or 1999, for the immigrant sample addition). All recontacts were asked for background information in 2005.

ER28069 "HOUSEHOLD ID #"

Household ID Number

This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting a 2005 ID number (ER25002) with the lowest value from among the 2005 ID numbers (ER25002) of those families comprising each such household group. This value was used in these file positions for all of the related households. Thus, if the user sorts the data ordered by this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with any other family unit or shared only with non-panel family units were given their own values for ER25002. The range of values is 1-8041, but the series is not contiguous. See 'Linking Data: Families Sharing Households' in Section I, Part 5, of the guide to the 1993 family data, 93GUIDE.PDF, for a discussion of ways to identify shared households in the early years of the PSID.

ER28070 "BIRTHS TO HEAD ONLY-2004"

Number of Children Born During Calendar Year 2004 to Head But Not Jointly with Wife/"Wife", Husband of Head, or First-Year Cohabitor

NOTE: The information in ER28070-ER28077 is based on data gathered in birth history questions interspersed throughout Section J of the 2005 questionnaire. The birth data were asked for:

- a) each male Head, unless all of the following were true: he was also Head in 2004, had the same legal Wife in both waves (ER28051=1 and ER28050=1 and ER25007=0-1), and she was age 45 or older at the time of the 2005 interview.
- b) each female Head, unless both of the following were true: she was Head, Wife, or "Wife" in 2004 and was age 45 or older at the time of the 2005 interview.
- c) each Wife or "Wife", unless both of the following were true: she was Head, Wife, or "Wife" in 2004 and was age 45 or older at the time of the 2005 interview.
- d) all other family unit members, including husbands of Head (ER33803=90) and first-year cohabitators (ER33803=88), who were age 12 through 44 at the time of the 2005 interview.
- e) all recontact Heads and Wives/"Wives".

The values for this variable indicate the number of children born between January 1, 2004, and December 31, 2004, to the Head but not jointly with the Wife/"Wife", husband of Head, or first-year cohabitor (ER33803=20, 22, 90 or 88, respectively), if one is present in the FU. The data are based only on information reported in the 2005 wave. Because of age and relationship variations in what was asked, this information is not known in some cases. See the note above for a description of the restrictions. If birth questions were asked about the Head but not the Wife/"Wife", husband of Head, or first-year cohabitor, then births to Head were counted in this variable.

ER28078 "2005 CORE/IMMIGRANT FAM WEIGHT NUMBER 1"

2005 Core/Immigrant Family Longitudinal Weight

This weight variable is used for analysis of all 2005 families, including the immigrant sample families that were added in 1997 and 1999 as well as the PSID core families.

The weight is constructed by summing the individual-level weight values (ER33848) for all persons associated with a given PSID response family in 2005 and calculating the average.

ER33801 "2005 INTERVIEW NUMBER"

2005 Interview Number (2005 ID Number)

The values for this variable represent the 2005 interview number of the family in which this individual was included in 2005. We interviewed 8,002 families in 2005.

<u>Value/Range</u>	<u>Code</u>	<u>Value/Range</u>	<u>Text</u>

ER33802 "SEQUENCE NUMBER 05"

2005 Sequence Number

This variable provides a means of identifying an individual's status with regard to the FU at the time of the 2005 interview.

<u>Value/Range</u>	<u>Code</u>	<u>Value/Range</u>	<u>Text</u>

ER33803 "RELATION TO HEAD 05"

2005 Relationship to Head

Note that these relationships are those to the 2003 Head for any individual whose 2005 sequence number (ER33802) is greater than 50, that is, has moved out of the FU. Thus, for example, if the 2003 Head is no longer present at the time of the 2005 interview, his or her relationship to Head is coded 10; the new 2005 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (ER33802) are coded 01.

Non-comparability Notes Appendix

- F-jj** Background section variable, asked only of new Heads/Wives/"Wives". Data values for cases with same Heads/Wives/"Wives" as in the previous wave have been carried forward from the time when these persons most recently became new Heads/Wives/"Wives" or when the questions were reasked of all Heads/Wives/"Wives". Some of these variables may require updating. See the User Guide or the specific variable descriptions in the codebook. Note that for 1994-1996, 1999 and 2001, data have not been brought forward for some Heads and Wives/"Wives". In 1997, the background sections were rewritten to include a number of new questions; these and many familiar items were reasked of everyone. Education, sibling information, and years worked were, however, NOT reasked. Information was not brought forward from prior waves for these variables. However, from 2003 forward, the data are complete for everyone.
- I-k** Field width differs.
